## Cosmetic syringes

The latest **market trend**

**NEW FORMAT** + **ULTRACONCENTRATED FORMULA** + **1 APPLICATION** = **IMMEDIATE RESULTS**

## What are cosmetic syringes?

Ultraconcentrated face masks that contain active ingredients used in the aesthetic surgery industry that make it possible to achieve optimal results in cosmetic applications.

They are designed and manufactured in accordance with the pharmaceutical industry requirements, and they are formulations that require no preservative systems through sterilisation processes.

This new and impressive format permits an effective, clean, precise and ergonomic application in an airless system that prevents the oxidation and contamination of the product, in a presentation that enhances the properties of these ultraconcentrated formulations at any point of sale.

Unlike other single dose cosmetic formats, their precise dosing allows 100% of the product to be used with no losses in one or more applications.

## How are they applied?

1. Remove the grey cap from the product
2. Insert the plunger into the rear part
3. Gently press the plunger to extract the product
4. Apply the product to the face
5. Leave on for between 10 and 15 minutes
6. Remove or leave on all night and remove in the morning

## What makes them a trend?

- Their innovative, next-generation presentation for the “retail” sector, which is identical to HA fillers.
- Their aesthetic medical results without the need for needles.
- Their formulas and ingredients are identical to those of fillers.
- Their effective and immediate results.

### SKIN REPAIR

HA + PANTHENOL + ORGANIC SILICA

NEF821

A cream gel that is lightweight and cool when applied. It contains a high concentration of Hyaluronic Acid (HA) (1.8%), panthenol and organic silica, veritable sources of hydration and regeneration. Recommended as a mask for use at night.

### SKIN RADIANCE

HA + VITAMINS + AA + COENZ + MINERALS

NEF823

A fluid mask with more than 35 active ingredients for a radiant skin in a single application. A combination of high and low molecular weight HA (1%) with all the vitamins, amino acids, coenzymes and minerals required to energise the skin, instantly making it smooth and radiant.

### ANTI-SPOT

TRANEXAMIC ACID

NEF667

A fluid, minimal content formula. Enriched with Tranexamic Acid (TXA), a popular active ingredient due to its great capacity to block the transfer and production of melanin, thus contributing to reducing skin spots. Sterile product.

### ANTI-WRINKLE

HA

NEF548

A fast-penetrating lightweight gel that combines HA (2%) of different molecular weights. Formulated for a double function: filling of expression lines and wrinkles and prolonged restoring of hydration to the skin, leaving it taut, firm and elastic. Sterile product.

### FIRMING

HA + DMAE

NEF521

A fast-penetrating solution for gentle application with an immediate lifting effect. A combination of HA with two molecular weights and DMAE, the star ingredient in firming beauty treatments. Sterile product.
